Assistive Technology for Environmental Adaptation

Assistive Technology for Environmental Adaptation helps people with motor, sensory, cognitive, or learning disabilities access items within the variety of settings in which they live.

Environment Setup: consider placement of items, access to items, lighting, furniture placement, flooring, ramps

Low Tech Items: Built up handles for utensils, toothbrushes, hairbrushes, keys, tactile cues for kitchen appliances, non skid mats, jar opener, magnifying glass, spill proof cup, universal cuff, dressing assists, light switch assists, grabber

Mid Tech Items: Talking timer, talking calculator, currency identifier, caregiver call chime, visual or vibrating alarms, switches, including manual, proximity, Bluetooth, head, foot, joystick, twitch

High Tech Items: Eye tracking, smart homes controls with tablet or phone control or with voice controls for thermostat, lighting, security, and appliances

Assistive Technology Resource Centers of Hawai'i (ATRC) is a nonprofit organization that provides information, resources, demonstrations, and device loans to help people make informed decisions and select the AT that best meets their needs. We do not sell or endorse any particular products.
