## Assistive Technology for Hearing

Assistive Technology for Hearing helps support individuals who have hearing loss or are deaf.

Consider environmental factors: line of sight, lighting, background noise, visual supports

Telecommunication: amplified, captioned, video, or TTY/TDD phone, relay service

Assistive Listening Devices: Amplification with headphone/microphone, classroom amplification

Smartphone apps: call captioning, live transcribing, sound amplifier, sign language interpretation

Visual or Vibrating Alerts: clock, baby monitor, fire alarm, doorbell, phone, timer

Communication Supports: pen/paper, two-way communication system, texting device

Assistive Technology Resource Centers of Hawai'i (ATRC) is a nonprofit organization that provides information, resources, demonstrations, and device loans to help people make informed decisions and select the AT that best meets their needs. We do not sell or endorse any particular products.
