## Assistive Technology for Vision

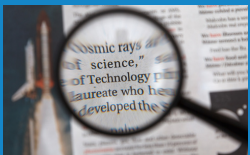

Assistive Technology for Vision helps support individuals who have low vision, are blind, or have conditions that limit their ability to comprehend what they are seeing.

Enlarge fonts, simplify graphics, vary font and background colors for contrast

Braille books, refreshable Braille display, Braille playing cards, Braille Legos

Handheld magnification devices, portable electronic magnifiers for close and distance magnification

Smartphone apps: instant reading of printed material, navigation assistance, identification of items

Screen reading accessibility features and dedicated programs, talking clocks, calculators, and tape measures

Kitchen items: liquid level indicator, spice measuring carousel, tactile appliance stickers

Assistive Technology Resource Centers of Hawai'i (ATRC) is a nonprofit organization that provides information, resources, demonstrations, and device loans to help people make informed decisions and select the AT that best meets their needs. We do not sell or endorse any particular products.
